## IMPORTANT

*Due to the curing process of resin it is impossible to list exact measurements for most parts in our catalog. Flexible resins have shrinkage rates that are not exact. Because of this variance we highly recommend before starting a project that samples be ordered for correct fitment for your project.

his magnificent entry way is exclusively Carlworks!

$\qquad$

Installation of Hybrid-Resin products are as easy as working with wood products. Why is that? Because all of our Hybrid Mouldings are made from Hardwood and Resin. We are the only manufacturer in the world using this blend of materials. Hybrid-Resin products are consistent in their density without the knots, warping, or cupping that make cutting wood sometimes difficult. Nailing, cutting and gluing any of our products can be performed with all STANDARD WOODWORKING TOOLS \& GLUES.

CLEANING - It is imperative all resin material be cleaned front and back with acetone.
(Industrial grade virgin acetone is recommended). This is a step that cannot be missed, as oil from your hands, grease, dirt, mold release, and curing agents can cause the finish to improperly bond and top coats to not cure properly. Always wear latex gloves during this step and for all following processes.

ADHESIVE - When using PEARLWORKS resin products always use glue or adhesive for a permanent bond.
Most woodworking glues and adhesives will work with resin products.
NAILING - Use only 23 gauge pneumatic nail guns when nailing PEARLWORKS resin components. Using larger nails on polyester resin will cause parts to crack or shatter. Larger nail guns can be used for superflex mouldings and on the wood portions of hybrid mouldings.

SCREWS - Larger components will need to be attached with screws. When using trim head screws pre-drilling is required to prevent cracking or splitting. Pearlworks recommends using square drive trim head screws. This type of wood screw has a very small head which lessens the risk of a stress fracture. Remember always use a good adhesive when installing Pearlworks products.

## FILLING

- Any nail or screw holes can be filled with standard wood putty or Bondo. The use of 23 gauge nails virtually eliminates the need to fill nail holes. Any gaps, cracks or joints in resin product installations can be filled the same way as wood products with putty, caulk or our favorite automotive body filler (bondo).
- All building materials expand and contract, including resin. When working with resin, cut and fit joints tightly. Make sure all joints are caulked prior to finishing. Caulking is a flexible filler that is used to hide shrinkage issues due to changing temperature and moisture conditions.

## Flex Moulding and Ornament General Product Information

## *All Ornamentation is Flexible, Stainable and Paintable.

1) The following procedures will aid in installation of Pearlworks products. When handling the flex moulding it is recommended you support the product with both hands to avoid any stress fractures or possible breakage. Any extreme bending may result in an unwanted stress fracture.
2) All Pearlworks products can be stained or painted with equal ease. Our hardwood maple hybrid mouldings can be stained using our new line of Stain, Glaze and Top Coat Finishing Systems, call for information.
3) Mouldings and ornamentation are produced with a highly textured woodgrain surface. All of our ornamentation can be sanded. (Please note: all woodgrain texture is only on the surface, excessive sanding will eliminate the wood grain texture.)
4) It is imperative all resin material be cleaned front and back with acetone.
(Industrial grade virgin acetone is recommended). This is a step that cannot be missed, as oil from your hands, grease, dirt, mold release, and curing agents can cause the finish to improperly bond and top coats to not cure properly. Always wear latex gloves during this step and for all following processes.
5) All building materials expand and contract, including resin. When working with resin, cut and fit joints tightly. Make sure all joints are caulked prior to finishing. Caulking is a flexible filler that is used to hide shrinkage issues due to changing temperature and moisture conditions.
6) Any wood-glue, construction adhesive, or super glue (Gel Form), along with nailing is an excellent way to apply material. Tape or clamps can also be used to hold material in place until adhesive cures. DO NOT OVER NAIL! Call Pearlworks for information on our new line of adhesives specifically formulated for resin products.
7) When using pneumatic pin nailers to apply material, use the smallest diameter nail possible. When nailing delicate ornamentation we recommend using 23 gauge pneumatic pin nail guns such as the Senco SHP-10 or the Grex PG35. *All Ornamentation is Flexible, Stainable and Paintable.
8) Do not over nail! Nailing should be spaced a minimum of $10^{\prime \prime}$ apart and $3 / 8$ " from any edge.
9) Pre-drilling is recommended if wood-screws are to be used. DO NOT USE STAPLE GUNS.
10) Do not over stress material.
11) All Pearlworks ornamentation can be cut, sanded or shaped using standard woodworking tools.
12) Material should be kept above $60^{\circ} \mathrm{F}$. If material is stored below $60^{\circ} \mathrm{F}$, then the flexing or nailing the material could break it.
13) Lay Flex Mouldings or ornament flat in the sun or under a heating blanket on the job-site. The warmer the material, the more flexible it becomes, thus any splitting will be eliminated.

- All sizes of parts in catalog are approximate, for modular parts view section of columns. Example: If you are building columns to go with either of our bases or plinth blocks, it is mandatory that you buy samples of these parts BEFORE you make any of the columns. All resin ornamentation will vary slightly in size due to the nature of the curing process of resin. Please note that all matching corner elements fit very closely, but are not exact. Please make sure all parts work before placing your order.

## CROWN MOULDINGS

## BASIC INSTALLATION TIPS

## *All Ornamentation is Flexible, Stainable and Paintable.

1) Check thickness of resin flex crown moulding to wood crown moulding. It may be necessary to shim or plane either product to have material properly line-up.
2) Screws work better than large nails. Pre-drill all screw holes first to prevent cracking. Install screws where they cannot be seen or are easily covered.
3) Cut and match outside crown corners first, let the inside corners end where they may.
4) Do not over-nail or over-stress material.
5) Use construction adhesive along with pre-drilling and screws. Pneumatic nails are recommended for installation of flex-resin crown. If pneumatic nail guns are used, only use pin nailers using the smallest diameter nail as possible ( 23 gauge micro- pinners). Nails should only be used to hold material until adhesive cures.
6) Pearlworks Crown Mouldings are specifically designed with deep carving and ornate detail. It is very difficult to match all patterns in every case. Don't worry on inside intersections. Pattern match can be improved by trimming the pattern with a utility knife. This technique is used extensively with great success.
7) All flex moulding should be kept as warm as possible. The warmer the material the more flexible it becomes, which aids in preventing any splitting from nails and screws that may occur.

Tip: Prior to installation place moulding in the sun or under an electric heating blanket to keep it warm. Heat guns are often used to spot heat specific areas to be nailed, or to provide additional flexibility.

## Exterior Installation

1) Never use hybrids that contain hardwood (Castle Collection). When these patterns are desired, always order them in resin or superflex.
2) Wood mouldings from Pearlworks (or any other manufacturer) need to be completely sealed on all sides with an exterior rated coating (in accordance with manufacturers specifications) prior to installation in exterior applications.
3) Resin is impervious to moisture, as well as extreme temperatures, making it a superior product for exterior applications, however the sun's ultraviolet rays will cause cracking if it is not protected by an opaque coating. Any exterior rated paint (or basecoat) will provide sufficient protection.
4) Always use exterior rated (Pearlworks Glue) and galvanized fasteners.
5) Proper caulking and maintenance will greatly increase the life span of the product.

## GENERAL CONDITIONS OF SALE

BUSINESS HOURS: 7:30 AM to 3:00 PM Monday through Friday. Showroom hours are 7:30 AM to 3:00 PM. We are closed on all major holidays.

## PRICING:

F.O.B. Tustin, CA 92780
$\$ 7.50$ minimum handling charge on orders under $\$ 100.00$
$7.5 \%$ (domestic) 10\% (international) handling charge on orders above $\$ 100.00$

## ORDERS OVER: Discount Schedule:

\$1,500 5\% Discount
\$3,500 7\% Discount
\$5,000 10\% Discount
\$15,000 13\% Discount
\$25,000 15\% Discount

## ORDERING:

- All invoices, shipping agreements, and credit card authorization forms will be faxed/emailed directly to the customer for their approval. Once approved and returned to Pearlworks, the order will then be processed.
- Due to constant product research and development, all product pricing and part numbers may change without notice. The customer must review all part numbers, descriptions, and prices before approval.
- When ordering moulding, please allow $20 \%$ additional footage for pattern repeat. Some radius-moulding orders will require a template with your order.
- All cancellations of orders that are in production will be subject to a service fee of $\$ 25.00$, or $5 \%$ of the total order (whichever is greater).
- Freight and handling charges on orders refused by the consignee will be charged to the buyer.

## TERMS:

- $100 \%$ of order will be charged on all approved orders. The shipping cost will be charged the day the order ships.
- Custom and special orders must be prepaid in full.
- All labor charges on custom pieces must be prepaid in full.
- All labor charges for completed custom work are non-refundable.
- All checks may be subject to a 7-day clearing period before product will be shipped.

## SHIPPING:

- If your order is in stock, it typically ships within 2-4 business days after your final approval. Large orders will take longer.
- Orders are shipped via FEDEX ground or common carrier, depending on size and weight. Please specify if priority shipping is desired.
- Requests for shipping cost cannot be accommodated until order is actually packaged.
- "Same Day Shipping" requests for priority shipments will be assessed a $25 \%$ surcharge. The request must be approved by the customer in writing by 11:00 AM Pacific Standard Time.

## NO RETURNS OR REFUNDS:

- All sales are final.
- Due to the number of individual designs being created daily our ability to stock each part is not possible.

We understand that choosing the right parts for your needs can be challenging, which is why our customer service and design team are always available to help answer any questions you may have before making a purchase. Give us a call at (714) 573-1700 or email to info@pearlworksinc.com.

For any large projects we recommend you order one of each piece for fitment. Adjustments on site will always occur. So ordering "one" will save time and money assuring your project will run smoothly.

## WARRANTY:

- If after careful inspection of your Pearlworks components, you feel there is a defect that renders a part unusable, please notify us in writing within 48 hours of receiving your delivery.
- Finishing or installing a component infers that you have accepted same and nullifies any warranty claim.
- Pearlworks liability shall not exceed the replacement cost of the defective part only, including shipping and handling.
- All wood mouldings must be maintained under stable humidity and temperature conditions for any warranty to apply.
- All flexible mouldings will split or crack if bent beyond our specified minimum radius limits.
- All resin flex mouldings are subject to varying shrinkage rates. Mouldings with repeat patterns will experience small differences in repeat pattern measurements.
- All sizes of parts in catalog are approximate. Example: If you are building columns to go with either of our bases or plinth blocks, it is mandatory that you buy samples of these parts before you make any of the columns. All resin ornamentation will vary slightly in size due to the delicate nature of the curing process of resin. Please make sure all parts work together before placing your order.
- Some of our more delicate designs can be fragile, because of this we cannot guarantee that they will arrive without a break or crack. Many factors such as extremely cold weather, physical shock to a package, etc. may cause a crack or a "clean break" in the thinner areas of many of our components. Typically, resin breaks smoothly and can easily be joined together with no visible seam appearance in the finished product. Cracked material can also be easily re-attached. Components that may experience a crack or break in transit (see example on next page) include any part that is less than $1 / 2$ inch thick at the thinnest point.

## MOULDING CUTTING SURCHARGES

- CUT IN HALF. 10 pieces or less no charge.
- CUT IN HALF. More than 10 pieces $\$ 5.00$ Ea. Cut.
- CUT to CUSTOMER SPECIFICATIONS. Non-refundable non-returnable. \$15 Per Piece.

## CLEAN BREAK RESIN REPAIR

The break at the end of this cartouche can easily be joined together with no seam showing. Typically, resin components break with a clean separation.

* Once glued, nailed, and finished to the mounting surface it's impossible to see break point.

This shows the same cartouche successfully glued together with no break showing.
Some of our more delicate designs can be fragile, because of this we cannot guarantee that they will arrive without a break or crack. Many factors such as extremely cold weather, physical shock to a package, etc. may cause a crack or a "clean break" in the thinner areas of many of our components. Unfortunately sending a new part does not guarentee safe arrival. If this is an issues please do not place an order.

## SHIPPING AND WILL CALL AGREEMENT

Our goal at Pearlworks is to assure that you receive your order complete and undamaged. Over the years we have experienced almost every conceivable shipping problem imaginable. We have listed a few guidelines to follow that will help, should you need to make any claims for damage or lost packages.

All ornamentation is sold to our customers F.O.B.; this stands for "freight on board". This term simply means, we guarantee all parts from defects or damage originating from our factory.

Our main challenge is shipping our ornamentation safely to our customers.
Pearlworks has a very competent shipping department that carefully packages and prepares your shipment. For this service our customers pay a "handling charge".

Once Pearlworks has packaged, sealed and safely delivered your packages to the shipping company, our obligation to this order is complete.

Pearlworks is not in any way circumventing responsibility, but merely stating we cannot be held responsible for replacement of parts damaged during transit, for which we have no control. We will assist our customers if they need any help when dealing with shipping companies to the best of our abilities.

Please follow the listed suggestions; they are based on years of experience in dealing with shipping companies.
Step 1) When the shipper delivers your packages you will have to sign a release in order for you to obtain your delivery. Please, immediately inspect the outside of your packages very carefully, looking for any scrapes, smashed corners or edges, holes, ripped sides or any visible damage you can find. If you find damage to your boxes note this with the shipper immediately before the driver leaves.
This will buy you time if you or the shipping company don't have the time to open and check for damaged parts.

If at all possible, open all packages in front of shipper at the time of delivery. If damage is found make a detailed list and note this with the shipper. Do not throw away any of the packaging materials or the boxes. The shipping company will need to inspect this before a claim can be processed.

Step 2) Make your claim for damage immediately with the shipping company; do not wait. The longer you wait, the longer it will take for the shipping company to reimburse you for your claim. (Pearlworks is not responsible for replacement of any part damaged during transit).

Step 3) If you sign your release form with the condition "subject to inspection", this means nothing to the shipping company. You need to inspect for damage if possible at the time of delivery. If all of these steps are followed, the shipper will approve your claim for damage. Once we have approval from the shipping company on your claim, we will immediately ship all replacement parts. If your claim is denied because you forgot or did not follow the listed guidelines, you have eliminated our ability to help you. All replacement parts for damage denied by the shipper will have to be reordered and paid by the customer.

FEDEX has a limit on the weight and size of each package. Anything larger must be shipped by common carrier.

All long mouldings are packaged in custom-built boxes that are $15^{\prime}$ long. All mouldings are surrounded by expandable foam. The handling charge for all orders is $5 \%$.

All other parts are packaged in standard size boxes. The Minimum handling charge for orders under $\$ 100.00$ is $\$ 5.00$ plus shipping.

Once orders are completed, the customer has 2 weeks to ship or pick up orders. All orders over 2 weeks old will be charged a $\$ 15.00$ holding and storage fee per week. Shipping cost is determined per shipment, by package weight and distance to ship. If you would prefer to use your own carrier, or require NEXT DAY, 2ND DAY, or would like to WILL CALL your order, please notify us as early as possible.

Canadian orders are subject to customs/broker charges please check with your local UPS or customs broker. Any and all duty and tax charges are based on weight and value of the shipped product and are the consignee's responsibility to pay before any product can be released.

There is a $25 \%$ surcharge for same day shipping, "not all orders can be processed in one day".
It is your responsibility to follow the above instructions. Please follow them in detail. If any of the above suggestions are not followed, our ability to help will be severely limited.

If you choose not to wait for the damage claim to clear before you order replacement parts, let us know, replacement orders are given priority. All replacement orders will be treated as a "NEW ORDER", all standard procedures and approvals will apply.

If you have any questions about the above information, please call Pearlworks immediately for clarification.

## DAMAGED OR MISSING GOODS

1. Pearlworks takes extreme measures to insure that every item you order is actually included in the shipment and carefully packaged so that damage does not occur. Our boxes are custom made and we encase most items in expandable foam to insure total protection.
2. If you notice any damage to a box shipped from Pearlworks or if you suspect that there may be an issue with your shipment, you must do the following:

- note any damage on the carrier's freight bill.
- open the box in the presence of the delivery person \& make your claim immediately.
- keep the box, packing material \& damaged parts for the carrier's future inspection.

3. Because we use so much packing material to protect our product, it is easy to overlook a part when unpacking. You must carefully go through all the packing material. If it seems that something might be missing, please notify us immediately. Do not throw away either the box or the packing material if you believe that something is missing or damaged.
4. Although claims for damaged components are to be made by you with the carrier, we will be happy to assist you with your claim. Orders for replacement parts will be considered a new order.

## BASES

## BASES

Our exciting line of bases are specifically designed for our $3 ", 4 ", \& 5 "$ inch wide door casings (MLD-182, MLD-183, MLD-184, \& MLD-185). These beautiful bases are a perfect match for our door \& entry mouldings.

Sold as pairs

BASE-118A
Width: 3-1/2"
Height: 13"
Thickness: 2"
(USE MLD-182 OR MLD-183)
BASE-118B
Width: 4-1/2"
Height: 15-3/4"
Thickness: 2-1/4"
(USE MLD-184)
BASE-118C
Width: 5-1/4"
Height: 15-3/4"
Thickness: 2-1/2"
(USE MLD-185)

BASE-119 Creates the perfect transition between our MLD-182, 183, MLD-184 or MLD-185 door trim and the baseboard.

## BASE-119A

Light ring RING-123C

ROST-120

## Ceiling 123 components:

Pearlworks has developed a new system using multiple size rings and a revolutionary finial designed for use with fire sprinklers to increase the versatility of our ceiling tiles.

1) The CEIL-123A series ceiling tile with RING-123B fits our FIN-120 finial, which is bored to fit standard concealed fire sprinkler heads ( $21 / 2$ inches) as well as made to the exact length to position the head for adequate water dispersion according to uniform fire code.
2) Use CEIL-123A with RING-123B and FIN-120 in locations without sprinkler heads and our ROST-120
 provides a perfect cap while hiding the bore in the finial.
3) When installing 4 inch recessed lighting CEIL-123B is used, the finial is eliminated, and RING-123B hides the standard trim rings.
4) When installing 6 inch recessed lighting CEIL-123C is used, the finial is eliminated, and RING-123C hides the standard trim rings.

## CEILINGS

## We recommed a standard $2 " \times 4 "$ or $2 " \times 6 "$ wood studs.

## CEILINGS

By assembling four pieces of Pearlworks crown moulding together in a square, attaching a piece of plywood to the top, and nailing a $1 / 2 \mathrm{in}$. x $1 / 2 \mathrm{in}$. wood strip around the perimeter, a decorative ceiling tile can be easily created to convert conventional suspended T-bar and tiles into a luxurious coffered ceiling. This method of construction greatly reduces the labor costs associated with custom installation, as well as providing the versatility and accessibility of the suspended ceiling.

See our Conceptual Line Drawing Catalogs for additional designs.

[^5]* All sizes are approx.- max W" x max H" x Thickness"

## CEILINGS

## CEIL-402

Sold as a 3 piece set
$25-1 / 2 " \times 25-1 / 2 " \times 2$ "

## Square Ceiling 110-1

The pattern of these ceiling tiles can be manipulated to fit rooms in a variety of shapes and sizes. The most important part of establishing layout is avoiding partial tiles at the intersection between the wall and ceiling. Using the layout described above the estimated starting price for Pearlworks parts run approximately $\$ 29$ per square foot.

## CEILINGS

## All Resin Ornamentation is Flexible, Stainable \& Paintable.

This spectacular barrel vaulted ceiling can add a palatial look to any room or hallway. While inherently complex, Pearlworks' flexible parts make this ceiling not only feasible, but easy. The plywood trusses and "wiggle wood" shell can be easily retrofitted in any room with adequate ceiling height. The amount of curve can be manipulated to accommodate for different ceiling heights and room sizes. Once the desired grid layout is established the remainder of the installation is relatively simple. Proper layout is essential for placement of both ornamentation and lighting fixtures. Layout consultation is available upon request.
Parts used: MLD-212F, PANL-130, OL-145, PB-292B, ROST-101, SW-127A, FIN-102, MLD-250, MLD-154D.

Rectangular Ceiling 118-1

*"THIS IS NOT A BUILD DRAWING". All drawings are "CONCEPT ONLY" and should be used as such.
*Projects built from concept drawings will "ALWAYS" vary due to unforseen installation and field measurement changes.

## Square Ceiling 101-2

## Radius Ceiling 103-8

80" Diameter

## Square Ceiling 107-1

This beautifully detailed ceiling has been engineered for easy installation in a variety of applications. Our modular panels and rings are designed to accommodate $4 \& 6$ inch recessed lighting and our finials allow for installation of fire sprinklers at the perfect position for water dispersion as per uniform fire code. The cost of parts for this ceiling varies greatly depending on size and layout, but the estimated starting cost for pearlworks parts as shown is approximately $\$ 3850$, or $\$ 110$ per square foot.

## CEILINGS

All Resin Ornamentation is Flexible, Stainable \& Paintable.

This Ceiling was built by using a distressed construction grade lumber grid for an "Old World" look. The diagonal pattern can be adjusted to install in any size room and is a perfect choice when ceiling height is an issue. At an overall thickness of $\mathbf{1 . 5}$ inches, this detail provides plenty of depth. The only Pearlworks part used is PANL-116B.

## T-BAR CEILING!

This Ceiling was designed using the commercial style T-Bar Drop Ceiling Grid System. A very simple and inexpensive way to build the classic coffered ceiling.

Introducing the

## CHAPLIN CEILING

The PEARLWORKS CHAPLIN CEILING was designed using only two components that are both flexible and adjustable. This is the only ceiling on the market that offers these unique features.

FLEXABILITY: Let's talk about the flexibility of our product. Unlike plaster ceilings that are rigid and brittle, PEARLWORKS flexible ceiling components are both pliable and durable. Why is this important? Shorter and easier Installation times. Just Imagine being able to install this ceiling to curved surfaces at no additional cost or time! Something that is both difficult and expensive to do in plaster.

INSTALLATION: I have never seen a drywall or plaster ceiling that was perfectly flat! PEARLWORKS flexible ceilings components give a tighter fit for imperfect ceiling surfaces. Typically Flexible ceiling installations require 60 to 70 percent less time.

MATERIAL COST: Depending on who you are buying your plaster ceiling from, Pearlworks flexible ceilings are very competitively priced. Imagine..... Less material cost, less installation time, infinite design possibilities and most importantly we have all ceilings in stock.

SHIPPING AND PACKAGING COST: Because plaster is a more brittle product, breakage in shipping is more likely to occur. Packaging plaster products is also more expensive and time consuming.

DESIGN OPTIONS: Pearlworks offers multiple variations within each ceiling pattern. Additionally, optional carving details can be added to the ceiling offering hundreds of different looks. This flexibility allows our customers to custom match every detail to match exactly the look they want. Pearlworks is the only manufacturer in the world presently offering this feature.

## Series 1 Variation 1

## FLEXIBLE CHAPLIN CEILING PATTERN

- Flexible material for flat or curved ceilings.
- All modular ceilings can easily be modified to create many new designs. (Call for info. Multiple patterns available).
- Quicker \& easier installation vs plaster ceilings.
- Does not require specialized installers.
- Material can be stained or painted.

*Final pricing depends on pattern density, pattern Layout, and waste factors.

## GRAHAM CEILING

FLEXABILITY: Let's talk about the flexibility of our product. Unlike plaster ceilings that are rigid and brittle, PEARLWORKS flexible ceiling components are both pliable and durable. Why is this important? Shorter and easier Installation times. Just Imagine being able to install this ceiling to curved surfaces at no additional cost or time! Something that is both difficult and expensive to do in plaster.

INSTALLATION: I have never seen a drywall or plaster ceiling that was perfectly flat! PEARLWORKS flexible ceilings components give a tighter fit for imperfect ceiling surfaces. Typically flexible resin ceiling installations require 60 to 70 percent less time.

MATERIAL COST: Depending on who you are buying your plaster ceiling from, Pearlworks flexible ceilings are very competitively priced. Imagine..... Less material cost, less installation time, infinite design possibilities and most importantly we have all ceilings in stock.

SHIPPING AND PACKAGING COST: Because plaster is a more brittle product, breakage in shipping is more likely to occur. Packaging plaster products is also more expensive and time consuming.

DESIGN OPTIONS: Pearlworks offers multiple variations within each ceiling pattern. Additionally, optional carving details can be added to the ceiling offering hundreds of different looks. This flexibility allows our customers to custom match every detail to match exactly the look they want. Pearlworks is the only manufacturer in the world presently offering this feature.

Sntroducing the very large array of

# GRAHAM CEILING CONCEPT <br> CEIL-100B-1A <br> (Triple OG shown) 

FLEXIBLE GRAHAM CEILING PATTERN
-This classic geometric ceiling complements any room.

- All modular ceilings can easily be modified to create many new designs. (Call for info. Multiple patterns and layouts available.)
-Flexible material for flat or curved ceilings.

-Quicker \& easier installation vs plaster ceilings. "NO" seams to blend.

## COLUMNS

OL-421
Assembled

OL-421-SET

OL-421 and OL-422 are a group of 3 onlays that can be chained together to any desired length. These onlays come in left and right side assemblies which can be purchased separately or as a group of 3 .

COLM-130 is specially made to accomodate onlays and drops (see drops section for specifications) 130 series columns come in 5 different width groups for an array of uses.

OL-422-SET

DP-200

DP- 201

This column can be used alone, but it is also made to accommodate the DP-200 \& 201 series of drops as well as the OL-421 and OL-422 series of onlays.

## COLUMNS

## COLUMNS

Montecito Collection

Our 131 series columns were designed specifically for our Montecito Kitchen Collection. We have a complete modular kitchen assembly ready to be assembled with optional parts that can be added for more detail or left out for a simple look. The beauty of the modular system is you can pick \& choose to create the look you want.

## COLUMNS

## All Resin Ornamentation is Flexible, Stainable \& Paintable.

## CORBELS

## All Resin Ornamentation is Flexible, Stainable \& Paintable.

Pearlworks, Inc. 14251 Franklin Ave. Tustin, CA 92780
Office: (714) 573-1700
Fax: (714) 573-1708 Toll Free: (855) PEARLWORKS www.pearlworksinc.com

## Corbel Installation

## Installation of all Pearlworks products can be performed using all STANDARD WOODWORKING TOOLS \& GLUES. Our hollow back corbels make mounting easy.

## Step: 1

Cut a block out of solid wood stock or plywood to fill hollow back of corbel (do not use pressed wood or fiber products).

## Step: 2

Use corbel to check positioning of block and firmly attach to wall or cabinet using appropriate length wood screws \& panel adhesive. When attaching to drywall or plaster use toggle bolts and panel adhesive (do not use plastic (molley: inserts).

## Step: 3

Place corbel over block and pre-drill appropriate size holes for wood screws, (trim head wood screws are recommended) double checking for correct location. Never use a hammer and nails when installing Pearlworks products, screws or 23 gauge micro pinner brads are recommended.

## Step: 4

Apply panel adhesive to back of corbel and sides of block and permanently attach corbel, making sure it is visually plumb and leveled.

Note: Using a level on top of corbel may not give an accurate reading due to crowning that occurs during casting.

* Pilot holes must align with wood mounting bracket.
* All holes can be filled with standard wood putty or bondo.
* Size of screws and drill bit for pilot holes will vary according to corbel size.

C

* Never use a hammer and nails when installing Pearlworks products, screws or 23 gauge micro pinner brads are recommended.

## CE-151 Series Modular recessed corner panels for CURVED TOP cabinets.

CE-151A $\$ 109.95$ (body only)
Rise: 5-1/2" Run: 14-3/4" Radius: 30"
For inside diameter cabinet openings between 30 "- 40 " wide
CE-151B \$131.95 (body only)
Rise: 7-1/2" Run: 17-3/4" Radius: 32"
For inside diameter cabinet openings between $40 "-48 "$ wide
The CE-151 series inserts are offered in 7 Unique Designs, sold as left and right pair. All of the carved details simply drop inside the corner element body.

Pearlworks pre-engineered corner panels save hours of labor. Installation is as simple as cutting a hole and nailing the panels in place.

[^11]
## CORNER ELEMIENTS

This series of corner elements was designed to easily add architectural embellishments to cabinets that use a curved top.

The CE-151 is shown with 7 Unique Designs:

Pearlworks is proud to be the first company to introduce a modular corner element for radius top cabinet face frames. Our new CE-151 series of corner elements offers 7 unique designs that fit small upper cabinets to larger units for entertainment centers.
All curved top face frames create dead corners that always look like they need some sort of detail. Pearlworks solution is a complete modular assembly which includes two corner elements along with the flexible moulding and keystone for the inner detail on your face frame.

## CORNER ELEMENTS

## Fixed Radius Corner Elements

## Cutting Instructions

*All precast radius corners are modified by the factory to make work. Some designs will require more blending at the inner sections due to design and profile variations.

All pre-cast radius corners come with factory suggested cut instructions as a starting point. Please note the degree number can and will vary depending on customer applications.

## CROWN MOULDING CORNER ELEMENTS

CORNER ELEMENTS

## COVE MOULDING CORNER ELEMENTS

Wall

Pearlworks has just produced its first radius cove ceiling corner elements. These corner elements are very unique in that they are produced in a light weight polyurethane material. Polyurethane material can be installed by any competent carpenter using standard woodworking tools and adhesives. A typical four corner room will take a crew of two carpenters 1 to 3 days for the installation.

Plaster ceilings require weeks to install by specialist who only do plaster. Most plaster companies are either on the east coast or mid west which requires these crews to fly to the job site, requiring hotel rooms and living expenses. These added labor and time increases can easily triple the cost.

Today these issues are a thing of the past and this new line has opened up an incredible look at a very affordable price and an ease of installation that has never been seen before.

## COVE MOULDING CORNER ELEMENTS

MLD-F-301
Cove moulding not flexible.
$12 "$ x 2-3/4" x 95 "
Polyurethane

[^15]
## CORNER ELEMENTS

* All sizes are approx.- max W" x max H" x Thickness"

## CORNER ELEMENTS

Sold As Left and Right Pair

CE-305A
$3-1 / 2^{\prime \prime}$ x $2-3 / 4$ " x $3 / 8$ " Ea. Side

CE-305B
$4-3 / 4 " \times 5 " \times 1 / 2 "$ Ea. Side

CE-305C
$7-3 / 4 "$ x $6-3 / 8^{\prime \prime}$ x $5 / 8^{\prime \prime}$ Ea. Side

Any 1/2" - 5/8" wide connection moulding will work with CE-305A. * Most popular designs for CE-305A.

Any 1/2" - 3/4" wide connection moulding will work with CE-305B.

* Most popular designs for CE-305B.

Any 3/4" - 1" wide connection moulding will work with CE-305C.

* Most popular designs for CE-305C.

* All sizes are approx.- max W" x max H" x Thickness"

## CORNER ELEMENTS

CE-306C
$4-1 / 2 " \times 10 " x$ " Ea. Side

Any 1-1/2" - 2" wide connection moulding will work with CE-306C.

* Most popular designs for CE-306C.

## FACE FRAMIES

## FACE FRAMISS

CE-M110 All curves pre-cast. All you need to do is cut to fit.

FACE FRAMES
Shell Design

FF-160A Flat Back
Sold as a 3 piece set.
Shell 6" W x 6" H x 1-3/4"
Arch: 18 " W x 7-1/4" H
Overall length $1-3 / 4^{\prime \prime} \times 57-1 / 2^{\prime \prime}$
FF-170A Flat Back
Sold as a 3 piece set.
Shell 10 " W x $9-1 / 2$ " H x 2-3/4"
Arch: $44^{" W}$ W x 14 " H
Overall length 2" x 87-1/4"

FF-160B Notched Back
Sold as a 3 piece set.
Shell 6" W x 6" H x 2-1/4"
Arch: 18 " W x 7-1/4" H
Overall length $1-3 / 4 " \times 57-1 / 2^{\prime \prime}$
FF-170B Notched Back
Sold as a 3 piece set.
Shell 10 " W x $9-1 / 2^{"}$ H x 2-3/4"
Arch: $44 \mathrm{~W} x 14^{\prime \prime} \mathrm{H}$
Overall length 2" x 87-1/4"

Matching extension Mouldings
MLD-165A
$1-3 / 4^{\prime \prime} \times 1$ " x 10 '
Matches FF-160A \& FF-161A
MLD-166A
$2 " \times 1-3 / 4 " \times 10^{\prime}$
Matches FF-170A \& FF-171A

## MLD-165B

$1-3 / 4^{\prime \prime} \times 1-3 / 4^{\prime \prime} \times 10^{\prime}$
Matches FF-160B, FF-161B
\& FF-162B
MLD-166B
2" x 1-3/4" x $10^{\prime}$
Matches FF-170B, FF-171B \& FF-172B

MLD-165A
MLD-166A

Flat Back
MLD-165A and MLD-166A sits on top of cabinet face frame.

MLD-165B
MLD-166B

Notched Back MLD-165B and MLD-166B wraps around cabinet face frame.

[^18]
## FACE FRAMES

Floral Shell Design

FF-161A Flat Back
Sold as a 3 piece set.
Shell \& Floral 17 " W x 6 " H x 1-1/2"
Arch: 17" W x 7-1/4" H
Overall length $1-3 / 4$ " x $56-1 / 2^{\prime \prime}$

## FF-171A Flat Back

Sold as a 3 piece set.
Shell \& Floral $23^{\prime \prime} \mathrm{W}$ x $9-1 / 2^{\prime \prime} \mathrm{H} \times 2-3 / 4$ "
Arch: 44" W x 14 " H
Overall length 2 " x 87 "

FF-161B Notched Back
Sold as a 3 piece set.
Shell \& Floral 17 " W x 6" H x 2-1/4"
Arch: 17 " W x 7-1/4" H
Overall length $1-3 / 4$ " x 56-1/2"
FF-171B Notched Back
Sold as a 3 piece set.
Shell \& Floral 23" W x 9-1/2" H x 2-1/2"
Arch: 44 W x $14^{\prime \prime} \mathrm{H}$
Overall length 2" x 87 "

* All sizes are approx.- max W" x max H" x Thickness"

MLD-165A
$1-3 / 4$ " x 1 " x 10 '
Matches FF-160A \& FF-161A
MLD-166A
2" x 1-3/4" x $10^{\prime}$
Matches FF-170A \& FF-171A
MLD-165B
$1-3 / 4^{\prime \prime} \times 1-3 / 4^{\prime \prime} \times 10^{\prime}$
Matches FF-160B, FF-161B
\& FF-162B
MLD-166B
$2 " \times 1-3 / 4^{\prime \prime} \times 10^{\prime}$
Matches FF-170B, FF-171B \& FF-172B

Flat Back MLD-165A and MLD-166A sits on top of cabinet face frame.

FF-162B Notched Back
Carving: 21 " W x 7" H x $3-3 / 4^{\prime \prime}$ T
Overall length $1-3 / 4$ " x 57 "
Profile matches MLD-165B

FF-172B Notched Back
Carving: 25-3/4" W x 10" H x 3-1/2" T
Overall length 2 " x 85-1/2"
Profile matches MLD-166B
MLD-166B

\& All notched back mouldings are specifically designed to wrap around the cabinet face frame. The notched back design eliminates the exposed inside edge of the face frame.

[^21]
## KEYSTONES

KS-106A
$4-1 / 2 " \times 4-1 / 4 " \times 2-1 / 4$ " designed for MLD-182 or MLD-183

KS-106B
$5-3 / 4$ " x 5-3/4" x 2-1/2" designed for MLD-184

KS-106C
7" x 7-1/2" x 3-1/4" designed for MLD-185

KS-107A 21-3/4" x 6-3/4" x 2-3/4"
designed for MLD-182 \& MLD-183
KS-107B 31" x 9" x 4-3/4"
designed for MLD-184
KS-107C $34 " \times 9-3 / 4 " \times 4-3 / 4 "$
designed for MLD-185

KS-109A
4" x 4-1/8" x 2"
designed for MLD-182 or MLD-183

KS-109B
$5-1 / 2 " \times 5-1 / 4 " \times 2-1 / 8 "$ designed for MLD-184

KS-109C
$6 " \times 6-5 / 8 " \times 3 "$
designed for MLD-185

KS-108A
$11-3 / 4^{\prime \prime} \times 15 " \times 3-3 / 4^{\prime \prime}$
For use with 12 " Friezes

Our new series of extended keystones (KS-107A-B-C) were specifically designed to use MLD-182, MLD-183, MLD-184, MLD-185. Can be used in straight or curved applications.

## KEYSTONES

## KEYSTONES

## KEYSTONES

## All Resin Ornamentation is Flexible, Stainable \& Paintable.

Pearlworks has developed Keystones that can be installed recessed into crown mouldings for added detail in confined areas. A "Fein Multimaster" saw is a must to facilitate this and many other installations of ornate components.

## MOULDINGS

## "EASY" CROWN MOULDINGS

"Easy" Crowns are a flexible "All Resin" crown moulding that installs similar to a baseboard, but looks like a 450 angled crown. Traditional crown mouldings are difficult and time consuming to mount. "Easy" Crown installs and cuts flat like a baseboard and is installed in a fraction of the time.

## TRIM MOULDINGS

## (ALL MOULDINGS AVAILABLE IN FLEXIBLE RESIN FOR CURVES)

Shown using optional insert MLD-111A

MLD-163
Available in both maple hardwood and flexible resin when curves need to be addressed.
Designed as an edge moulding. Its most pop-
 ular uses are for cabinet shelving edges, desks and furniture top edges.

MLD-220A
Designed as a transitional moulding for our capitols with built-in collars. Other popular uses for these mouldings are for cabinet shelving edges, desks
 and furniture top edges.

## THE MOULDINGS LISTED BELOW ARE 5/8" WIDE AND ARE DESIGNED TO FIT INSIDE OUR MLD-163 \& MLD-220A

MLD-320 Our modular baseboard system is designed with 3 components.
These components include base moulding MLD-320, matching inside and outside corner bases (BASE-109-I \& BASE-109-O) and multiple carved insert mouldings for MLD-320. This system is excellent for home baseboard installation or as a base for fine cabinetry and furniture.

[^25]

The Superflex Moulding in photo A was installed on edge. Gentle curves can be accomplished with regular resin. More agressive curves may require superflex.

Bottom Repeat: 2" Bottom Insert: MLD-123D

## 480-B Series 10" Width

Top Repeat: 6-1/2" Thickness: 1-1/2" Sold in random lengths. Minimum length sold $5^{\prime}$. Also available in Flex Resin. Call for details.

* Crown bottom insert is not installed. This allows installer to better maximize pattern match.

480-C Series $10^{\prime \prime}$ Width
Top Repeat: 7-1/4" Thickness: 1-1/2"
Sold in random lengths. Minimum length sold 5 , Also available in Flex Resin. Call for details.

MLD-480C-1

Bottom Repeat: 2-1/2" Bottom Insert: MLD-137E

* Crown bottom insert is not installed. This allows installer to better maximize pattern match.
 Bottom Insert: MLD-135D

MLD-480C-4
Bottom Repeat: 5-1/4" Bottom Insert: MLD-111D

MLD-480C-3
Bottom Repeat: 16-1/2"
Bottom Insert: MLD-204D

MLD-480C-5
Bottom Repeat: 2
Bottom Insert: MLD-103D

MLD-480C-7
Bottom Repeat: 2" Bottom Insert: MLD-123D

## 480-E Series 10" Width

## Top Repeat: 11" Thickness: 1-1/2"

Sold in random lengths. Minimum length sold 5 , Also available in Flex Resin. Call for details.

* Crown bottom insert is not installed. This allows installer to better maximize pattern match.

MLD-480E-4
Bottom Repeat: 5-1/4"
Bottom Insert: MLD-111D

MLD-480E-3
Bottom Repeat: 16-1/2"
Bottom Insert: MLD-204D

MLD-480E-5
Bottom Repeat: 2
Bottom Insert: MLD-103D

MLD-480E-7
Bottom Repeat: 2" Bottom Insert: MLD-123D

## Contemporary Collection

## Concave 3D Moulding

## Convex 3D Moulding

54

## Radius 3D Contemporary Moulding

Only Pearlworks has these CURVES! 3D Contemporary Mouldings ONLY at Pearlworks allows the 3D panel look without the extensive installation labor time and cost. No panel on the market can be used on a radius wall!

## Custom Radius Flex Crown Moulding Curved Chart

| Flex Crown Part Number | Flex Crown Moulding Width | Minimum Curve Radius |
| :--- | :---: | :---: |

| MLD-156B | $6 "$ | $82^{\prime \prime}$ |
| MLD-156C | $8-1 / 2 "$ | $96^{\prime \prime}$ |

Flex crown mouldings have a limit on flexibility determined by the moulding width. We have listed the tightest recommended radius for each width of crown moulding. We do not recommend flexing any of the crown mouldings beyond its minimum radius listing or splitting and stress cracks can occur.

The minimum radiuses for flex crown mouldings are determined by width, thickness and angle of back cut (typically 45 degrees) of the moulding. The formula for determining the minimum radius for crown moulding is 3.2-4.0 moulding width. This formula is intended as a guideline only. There are many variables that must be taken into consideration when doing radius crown. Typically the larger crowns have less room for error. We intentionally design our mouldings on the thick side so that they have less tendency to dent where they are attached to a ceiling and wall, producing a smoother radius with less dimpling.

We do not recommend flexing any of the crown mouldings beyond its minimum radius limits, otherwise splitting and stress cracks could occur. If a customer chooses to exceed the limits of these recommended radiuses, Pearlworks will not accept responsibility for any and all problems that may occur.

When ordering flex crown moulding, you must specify if it is for an inside curve wall, or an outside curve wall.

If you have questions, please call (714) 573-1700

# Flex Moulding and Ornament General Product Information 

*All Resin Ornamentation is Flexible, Stainable and Paintable.

1) The following procedures will aid in installation of Pearlworks products. When handling the flex moulding it is recommended you support the product with both hands to avoid any stress fractures or possible breakage. Any extreme bending may result in an unwanted stress fracture.
2) All Pearlworks products can be stained or painted with equal ease. Our hardwood hybrid mouldings can be stained using any type of stain, glaze, and top coat system. See our staining video on our website: www.pearlworksinc.com/concepts/videos
3) Mouldings and ornamentation are produced with a highly textured woodgrain surface. All of our ornamentation can be sanded. (Please note: all woodgrain texture is only on the surface, excessive sanding will eliminate the wood grain texture.)
4) Proper cleaning with acetone or lacquer thinner should be done before any staining or painting is performed. If this basic cleaning step is overlooked, lifting and peeling of your finish could occur. Any type of paint can be used, oil or water base.
5) All building materials expand and contract, including resin. When working with resin, cut and fit joints tightly. Make sure all joints are caulked prior to finishing. Caulking is a flexible filler that is used to hide shrinkage issues due to changing temperature and moisture conditions.
6) Any wood-glue, construction adhesive, or super glue (Gel Form), along with nailing is an excellent way to apply material. Tape or clamps can also be used to hold material in place until adhesive cures. DO NOT OVER NAIL! Call Pearlworks for information on our new line of adhesives specifically formulated for resin products.
7) When using pneumatic pin nailers to apply material, use the smallest diameter nail possible. When nailing delicate ornamentation we recommend using 23 gauge pneumatic pin nail guns such as the Senco SHP-10 or the Grex PG35. *All Ornamentation is Flexible, Stainable and Paintable.
8) Do not over nail! Nailing should be spaced a minimum of 10 " apart and $3 / 8^{\prime \prime}$ from any edge.
9) Pre-drilling is recommended if wood-screws are to be used. DO NOT USE STAPLE GUNS.
10) Do not over stress material.
11) All Pearlworks ornamentation can be cut, sanded or shaped using standard woodworking tools.
12) Material should be kept above $60^{\circ} \mathrm{F}$. If material is stored below $60^{\circ} \mathrm{F}$, then the flexing or nailing the material could break it.
13) Lay Flex Mouldings or ornament flat in the sun or under a heating blanket on the job-site. The warmer the material, the more flexible it becomes, thus any spliting will be eliminated.

- All sizes of parts in catalog are approximate, for modular parts view section of columns. Example: If you are building columns to go with either of our bases or plinth blocks, it is mandatory that you buy samples of these parts BEFORE you make any of the columns. All resin ornamentation will vary slightly in size due to the nature of the curing process of resin. Please note that all matching corner elements fit very closely, but are not exact. Please make sure all parts work before placing your order.

## CROWN MOULDINGS

## BASIC INSTALLATION TIPS

## *All Resin Ornamentation is Flexible, Stainable and Paintable.

1) Check thickness of resin flex crown moulding to wood crown moulding. It may be necessary to shim or plane either product to have material properly line-up.
2) Screws work better than large nails. Pre-drill all screw holes first to prevent cracking. Install screws where they cannot be seen or are easily covered.
3) Cut and match outside crown corners first, let the inside corners end where they may.
4) Do not over-nail or over-stress material.
5) Use construction adhesive along with pre-drilling and screws. Pneumatic nails are recommended for installation of flex-resin crown. If pneumatic nail guns are used, only use pin nailers using the smallest diameter nail as possible ( 23 gauge micro- pinners). Nails should only be used to hold material until adhesive cures.
6) Pearlworks Crown Mouldings are specifically designed with deep carving and ornate detail. It is very difificult to match all patterns in every case. Don't worry on inside intersections. Pattern match can be improved by trimming the pattern with a utility knife. This technique is used extensively with great success.
7) All flex moulding should be kept as warm as possible. The warmer the material the more flexible it becomes, which aids in preventing any spliting from nails and screws that may occur.

Tip: Prior to installation place moulding in the sun or under an electric heating blanket to keep it warm. Heat guns are often used to spot heat specific areas to be nailed, or to provide additional flexibility.

## Exterior Installation

1) Never use hybrids that contain hardwood (Castle Collection). When these patterns are desired, always order them in resin or superflex.
2) Wood mouldings from Pearlworks (or any other manufacturer) need to be completely sealed on all sides with an exterior rated coating (in accordance with manufacturers specifications) prior to installation in exterior applications.
3) Resin is impervious to moisture, as well as extreme temperatures, making it a superior product for exterior applications, however the sun's ultraviolet rays will cause cracking if it is not protected by an opaque coating. Any exterior rated paint (or basecoat) will provide sufficient protection.
4) Always use exterior rated glue and galvanized fasteners.
5) Proper caulking and maintenance will greatly increase the life span of the product.

## Matching Pearlworks Standard Flex/Superflex Resin Moulding with Pearlworks Hardwood Profiles

The problems associated with matching wood and resin mouldings have been discussed for decades. All wood mouldings will expand and contract depending on the moisture in the air. Wood mouldings will also vary slightly in production runs from variations in wear on the cutting knives used to make the mouldings.

All polyester based resin mouldings will shrink due to the exothermic reaction that takes place during the curing process. Mouldings can also have different shrinkage rates due to flex resin formulas and temperature during the casting process.

This is why when you try to match the profile exactly sometimes it works and sometimes not.

There are two fixes.
Fix \#1 - Use our superflex material which is a urethane based material. This material has minimal shrinkage rates which virtually eliminates any matching issues.

Fix \#2 - If the moulding is less than $\mathbf{6}^{\text {" }}$ wide the shrinkage of our standard polyester based flex will be minimal. The shrinkage can easily be blended to the larger width wood mouldings with minimal blending issues.

*As you can see this 10 " polyester based material has almost $1 / 4$ " of shrinkage.

## MOULDING PRICE LIST

## ONLAYS

OL-421 and OL-422 are groups of three onlays that can be chained together to any desired length. The OL-421 series come in left and right side assemblies while the OL-422 series are nondirectional, both can be purchased separately or as a group of three compatible parts. The COLM- 130 is especially made as the backing to accommodate OL-421\&422 onlays, (as well as other parts) and create a height adjustable assembly that is available in five different widths.

# ONLAYS 

## PANELS

## All Resin Ornamentation is Flexible, Stainable \& Paintable.

## PANELS

## PANELS

0ur concept in building cabinets is offering our clients multi-design options that can easily be integrated without any trouble.

The modular system is just the answer.
The raised panel bodies are designed for standard stile \& rail wood door frames. Once the raised panel body is assembled into the door frame, it can now be hung on the cabinet.

Now you can choose up to 4 different raised panel carved inserts. These inserts can simply be placed in the panel for a perfect fit.

All of our door panels will fit any of our modular carvings.

Door Cross Section

Our resin raised panels were designed to be fit into a wood stile + rail door. All doors can be assembled and hung on to the cabinet without the carved detail installed. Now your customer can fit the 4 carved detail on the door to see which design looks best.

## PANELS

Our new modular panel system now offers more versatility with numerous applications. Please see the next several pages for recommendations. All series 1 and 2 frames are designed to accept our carved panels below.

PANL-1 series Panel Frame with cove detail

PANL-2 series
Panel Frame with traditional detail

| Part Number | Size |
| :---: | :---: |

PANL-106A and PANL-106B is an interlocking pattern designed for coverage of large areas with minimal waste.

## PANELS

PANL-105A \& B is an interlocking pattern designed for coverage of large areas with minimal waste.

## PANELS

All Modular Panels can be Interlocked for coverage of large areas with minimal waste.

All of our modular panels easily interlock for coverage of large areas. No seams and low waste factors, another plus.

Serving Cabinet Combo

This beautifully designed cabinet combination blends three assemblies (upper cabinet, backsplash, and lower cabinet).
The drawings on the following pages show how this cabinet was made using Pearlworks architectural components. By alternating components from our catalog hundreds of different looks can be achieved, please see our Pearlworks designer concepts line drawing book 2 for alternate suggestions.

## MONACO CORNER CEILING PANEL

Close up of detail.

## Monaco Ceiling Advantages:

- Panels in stock ready to ship!
- Modular Design allows for infinite Custom Design capabilities.
- Lightweight and flexible for easy installation.
- Most ceiling designs can be installed in one day. A huge savings vs. plaster installations that take weeks to complete.
- Our designs are flexible at no additional cost which allows for easy installation on all radius and flat ceiling surfaces.......barrel ceilings our specialty!
- All Pearlworks parts are stainable and paintable.
- All masters are hand carved for unmatched detail.

We never use a CNC machine!

- Installation can be done by carpenters using standard wood working tools. This eliminates the high cost of specialty installation crews.

$3-5 / 8^{\prime \prime} \times 1-1 / 2^{\prime \prime} \times 3 / 4$ " works with $3-1 / 4$ " columns SP TC-101B
5" x $1-1 / 2^{\prime \prime} \times 3 / 4$ "
works with 4-1/2" columns

## SP TC-101C

5-7/8" x 2-1/4" x 1 " works with $5-1 / 2$ " columns

## SP TC-101D

$7-5 / 8^{\prime \prime} \times 3-3 / 8^{\prime \prime} \times 1-1 / 4^{\prime \prime}$
works with 7" columns

We have developed several transition collars to minimize the labor involved in connecting our columns with our corbels. These collars are easy to install and provide a smooh transition between the column and corbel. Please use the lists of corresponding parts to order the correct combination of corbel, collar, and column.

SPTC-101AA \& SPTC-102AA Transition Collars are designed to be used with the following corbels: CB-103A, CB-103B, CB-218A, CB-219A, CB-220A, CB-221A \& CB-317A..

SPTC-101A \& SPTC-102A Transition Collars are designed to be used with the following corbels: CB-112B, CB-218B, 218C 219B, CB-219C, CB-220B, CB-220C, CB-221B, CB-221C, CB-317B, CB-317C \& CB-317D.

SPTC-101B \& SPTC-102B Transition Collars are designed to be used with the following corbels: CB-104A, CB-104B, CB-218D, 218E, CB-219E, CB-220D, CB-221D, CB-221E \& CB-313.

SPTC-101C \& SPTC-102C Transition Collars are designed to be used with the following corbels:; CB-104C, CB-130A, CB-218E, CB-218F, CB-219E, CB-219F, CB-220E, CB-220F, CB-221E, CB-221F, CB-301A, CB-302A, CB314, \& CB-316.

SPTC-101D\& SPTC-102D Transition Collars are designed to be used with the following corbels: CB-130B, CB-160, CB-165, CB-300, CB-318.

SP TC-102AA
$2-3 / 8^{\prime \prime} \times 1-1 / 4 " \times 5 / 8 "$ works with 2-1/4" columns SP TC-102A
$3-1 / 2^{\prime \prime} \times 1-1 / 2^{\prime \prime} \times 3 / 4$ " works with $3-1 / 4$ " columns SP TC-102B
$4-3 / 4^{\prime \prime} \times 1-5 / 8^{\prime \prime} \times 3 / 4^{\prime \prime}$ works with 4-1/2" columns SP TC-102C
$5-3 / 4 " \times 2-1 / 4 " \times 1$ " works with 5-1/2" columns
SP TC-102D
$7-3 / 8 "$ x $3-1 / 2^{\prime \prime} \times 1-1 / 4 "$
works with 7" columns

"Some of the transitions will require minor alterations of either the collar or corbel to achieve the optimal fit."

## Trevor Collection

The Trevor door collection is a surround system developed exclusively by Pearlworks for practical assembly of a classic ornate door surround. We created a column combination consisting of a base, column, corbel, and plinth block that fits with our proprietary curved crown and cartouche, this completes a beautifully designed surround that is engineered for easy and quick installation (45 minutes) in a wide range of sizes.

## TREVOR SINGLE DOOR SURROUNDS

## Single surrounds come in two different width groups

Group SDT-100A is designed to fit openings from 2' wide to 2' 6 " wide.

Group SDT-100B is designed to fit openings from $2^{\prime} 8^{\prime \prime}$ wide to $3^{\prime}$ ' wide.

The cartouche has been designed with specific cut off points for the various widths. The crown and backing plate are made with sufficient width to provide adjustability within the designated parameters.

Both of these width groups can be used with all combinations of $4-1 / 2^{\prime \prime}$ wide columns, plinth blocks, corbels and bases.

## TREVOR COLLECTION ASSEMBLY <br> SINGLE DOOR OPENING

Assembly Part \#: SDT-100A (For Door Openings: $2^{\prime} .0^{\prime \prime}, 2^{\prime} .2^{\prime \prime}, 2^{\prime} .4^{\prime \prime}, 2^{\prime} .6^{\prime \prime}$ )

COLM-115B

The Trevor Collection uses COLM-115B. If desired any of our modular 4-1/2" Columns can be used. All columns options are on page 9 of this section.

## TREVOR DOUBLE DOOR SURROUNDS

Double door surrounds come in different width groups. Group DDT-100A is designed to fit openings from $4^{\prime}$ wide to $4^{\prime} 8^{\prime \prime \prime}$ wide. DDT-100B is designed to fit openings from $5^{\prime}$ wide to $5^{\prime} .8^{\prime \prime}$ wide. The width designation pertains only to the crown, cartouche and backing plate. The cartouche has been designed with specific cut off points to fit various widths. The crown and backing plate are made with sufficient width to provide adjustability within the designated parameters. Both of these width groups can be used with all combinations of $4-1 / 2 "$ wide columns, plinth blocks, corbels and bases.
DDT-100C is designed to fit openings from $6^{\prime}$ to $9^{\prime} 6^{\prime \prime}$ wide. When using the DDT-100C it is necessary to use 5-1/2" width columns, plinth blocks, corbels and bases.
DDT-100D is designed to fit openings from 6' to $9^{\prime} 6^{\prime \prime}$ wide. When using the DDT-100D it is necessary to use 7 " width columns, plinth blocks, corbels and bases.

## FREESTYLE AND PRECAST PANELS

Pearlworks over the years developed a simple modular system and applied it to wallpanel designs. We have taken the complex and simplified it.
Take a look at our wall panel offerings to see which system works best for your project.
Pearlworks offers two types of flexible wall panels, FREESTYLE and PRECAST.

## FLEXIBLE FREE STYLE WALL PANELS

Freestyle wallpanels have some very unique and useful positives for designers and carpenters. The wall panels come with all flexible components not attached together. This allows maximum adjustability for width and height. Because the individual components are flexible, they are easily moved to create overlapping connections. It also allows you to change the shape of each component and apply them to curved surfaces.

## FLEXIBLE PRE CAST WALL PANELS

Our flexible pre cast panels were designed for ultimate ease of installation and cost savings. Each flexible wall panel typically comes as a 4 piece set.
You will get an upper and lower pre cast design along with two connection moldings.
Pre cast wall panels are designed to be installed in less than one hour, on any flat or curved surface. No other wall panel on--- the market can do this.

Pre cast wall panels only have height adjustiblity.

## Versailles Side Panel

## Versailles Side Panel Components

The Versailles side wall panels were created using our modular system, which allows maximum design adjustability. Each of the 5 different component designs can be used in a wide variety of locations to create different looks and any height needed.

All of the designs that require connection moldings have built in attachment points which require no blending. This detail when installing saves hours of labor cost.

I urge you to compare these highly detailed carved side panels to anything on the market today. Not only are they the easiest components to install but they are easily stained or painted and can be applied to any flat or curved surface.

* Each of the 5 versailles modular designs can be used in any combination and quantity to create any height required.

SIDE PANEL SET
Total $\$ 885.20$ (as shown) Including 1 length of MLD-213B

VSS5 $\$ 164.95$ ea.

## Custom Freestyle Wallpanels

Custom wall panels can be created by using any number of components to create a top and bottom wall panel header. CP-217A is a single casting with additional scrolls added to create the attachment point for connection mouldings.

CP-217A comes in three additional sizes for added versatility which can not only create different sized wall panels and ceilings as well.

CP-217

## Custom Freestyle Wallpanel

## FreeStyle Part Designs

CP-217AA $\$ 99.95$
$13-1 / 2^{\prime \prime} \times 16^{\prime \prime} \times 1^{\prime \prime}$

CP-217A \$149.95
$17^{\prime \prime} \times 21^{\prime \prime} \times 1-1 / 2^{\prime \prime}$

CP-217B \$169.95
$21^{\prime \prime}$ x $26^{\prime \prime}$ x 1-1/2"

* All sizes are approx.- max W" x max H" x Thickness"

## Wallpanels

## IMPORTANT

*Due to the curing process of resin it is impossible to list exact measurements for most parts in our catalog. Flexible resins have shrinkage rates that are not exact. Because of this variance we highly recommend before starting a project that samples be ordered for correct fitment for your project.

Catalog 2024 Version 1 $\$ 59.95$
