CORNER ELEMENTS

CE-151 Series Modular recessed corner panels for CURVED TOP cabinets.

CE-151A \$109.95 (body only)
Rise: 5-1/2" Run: 14-3/4" Radius: 30"
For inside diameter cabinet openings between 30"-40" wide

CE-151B \$131.95 (body only)
Rise: 7-1/2" Run: 17-3/4" Radius: 32"
For inside diameter cabinet openings between 40"-48" wide

The CE-151 series inserts are offered in 7 Unique Designs, sold as left and right pair. All of the carved details simply drop inside the corner element body.

Pearlworks pre-engineered corner panels save hours of labor. Installation is as simple as cutting a hole and nailing the panels in place.

* All sizes are approx.- max W" x max H" x Thickness"

CORNER ELEMENTS

This series of corner elements was designed to easily add architectural embellishments to cabinets that use a curved top.

The CE-151 is shown with 7 Unique Designs:

CE-151A shown with CE-151A-1

Pearlworks is proud to be the first company to introduce a modular corner element for radius top cabinet face frames. Our new CE-151 series of corner elements offers 7 unique designs that fit small upper cabinets to larger units for entertainment centers.

All curved top face frames create dead corners that always look like they need some sort of detail. Pearlworks solution is a complete modular assembly which includes two corner elements along with the flexible moulding and keystone for the inner detail on your face frame.

CORNER ELEMENTS

CORNER ELEMENTS

Fixed Radius Corner Elements

Cutting Instructions

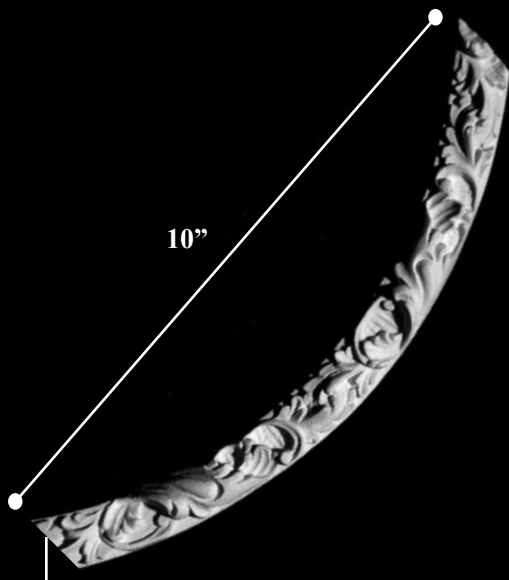

Set your mitre saw to 39° to make this cut.

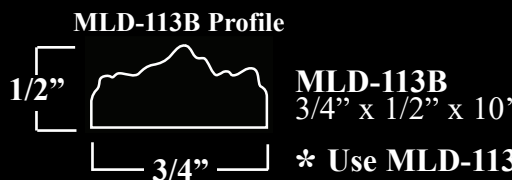

*All precast radius corners are modified by the factory to make work. Some designs will require more blending at the inner sections due to design and profile variations.

All pre-cast radius corners come with factory suggested cut instructions as a starting point. Please note the degree number can and will vary depending on customer applications.

CORNER ELEMENTS

Precast radius corner elements require a specific cut angle. We use 43° for the connection moulding joint.

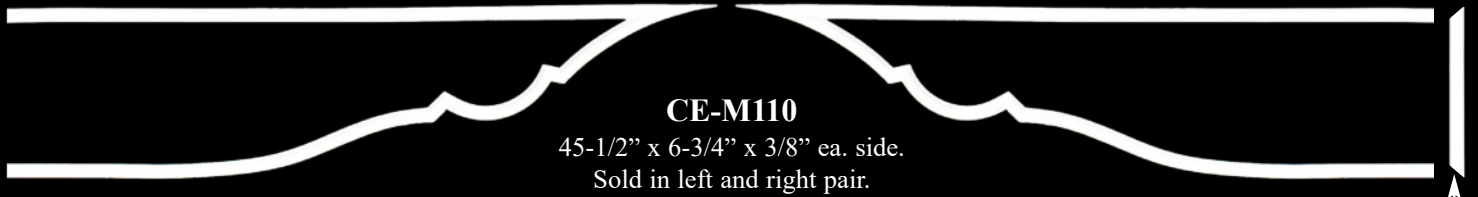

* Use MLD-113B for straights.

* All sizes are approx.- max W" x Thickness" x Length"

CORNER ELEMENTS

Corner element is designed for FF-101 Face Frame.

CE-M110

45-1/2" x 6-3/4" x 3/8" ea. side.

Sold in left and right pair.

* CE-M110 All curves pre-cast.
All you need to do is cut for ends.

MLD-110 Profile * Use MLD-110 for straights.

Polyurethane Foam
Corner Element

Ceiling

Pearlworks has just produced its first radius cove ceiling corner elements. These corner elements are very unique in that they are produced in a light weight polyurethane material. Polyurethane material can be installed by any competent carpenter using standard woodworking tools and adhesives. A typical four corner room will take a crew of two carpenters 1 to 3 days for the installation.

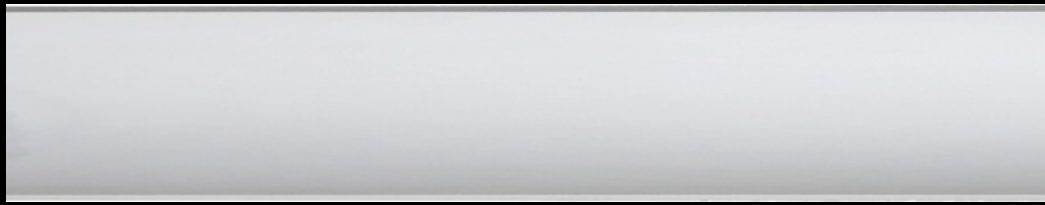

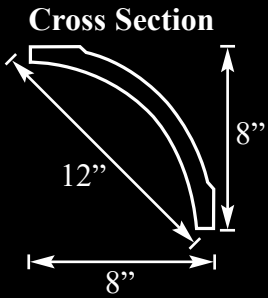

Plaster ceilings require weeks to install by specialist who only do plaster. Most plaster companies are either on the east coast or mid west which requires these crews to fly to the job site, requiring hotel rooms and living expenses. These added labor and time increases can easily triple the cost.

Today these issues are a thing of the past and this new line has opened up an incredible look at a very affordable price and an ease of installation that has never been seen before.

COVE MOULDING CORNER ELEMENTS
