

TREVOR COLLECTION

The Trevor door collection is a surround system developed exclusively by Pearlworks for practical assembly of a classic ornate door surround. We created a column combination consisting of a base, column, corbel, and plinth block that fits with our proprietary curved crown and cartouche, this completes a beautifully designed surround that is engineered for easy and quick installation (45 minutes) in a wide range of sizes.

TREVOR SINGLE DOOR SURROUNDS

Single surrounds come in two different width groups

Group SDT-100A is designed to fit openings from 2' wide to 2' 6" wide.

Group SDT-100B is designed to fit openings from 2' 8" wide to 3' wide.

The cartouche has been designed with specific cut off points for the various widths. The crown and backing plate are made with sufficient width to provide adjustability within the designated parameters.

Both of these width groups can be used with all combinations of 4-1/2" wide columns, plinth blocks, corbels and bases.
