## FREESTYLE AND PRECAST PANELS

Pearlworks over the years developed a simple modular system and applied it to wallpanel designs. We have taken the complex and simplified it. Take a look at our wall panel offerings to see which system works best for your project.

Pearlworks offers two types of flexible wall panels, FREESTYLE and PRECAST.

### FLEXIBLE FREE STYLE WALL PANELS

Freestyle wallpanels have some very unique and useful positives for designers and carpenters. The wall panels come with all flexible components not attached together. This allows maximum adjustability for width and height. Because the individual components are flexible, they are easily moved to create overlapping connections. It also allows you to change the shape of each component and apply them to curved surfaces.

### FLEXIBLE PRE CAST WALL PANELS

CT-204A

Our flexible pre cast panels were designed for ultimate ease of installation and cost savings. Each flexible wall panel typically comes as a 4 piece set. You will get an upper and lower pre cast design along with two connection moldings.

Pre cast wall panels are designed to be installed in less than one hour, on any flat or curved surface. No other wall panel on--- the market can do this.

Pre cast wall panels only have height adjustibility.

**\* Call for radius limits.**

## Versailles Side Panel

# Versailles Side Panel Components

The Versailles side wall panels were created using our modular system, which allows maximum design adjustability. Each of the 5 different component designs can be used in a wide variety of locations to create different looks and any height needed.

All of the designs that require connection moldings have built in attachment points which require no blending. This detail when installing saves hours of labor cost.

I urge you to compare these highly detailed carved side panels to anything on the market today. Not only are they the easiest components to install but they are easily stained or painted and can be applied to any flat or curved surface.

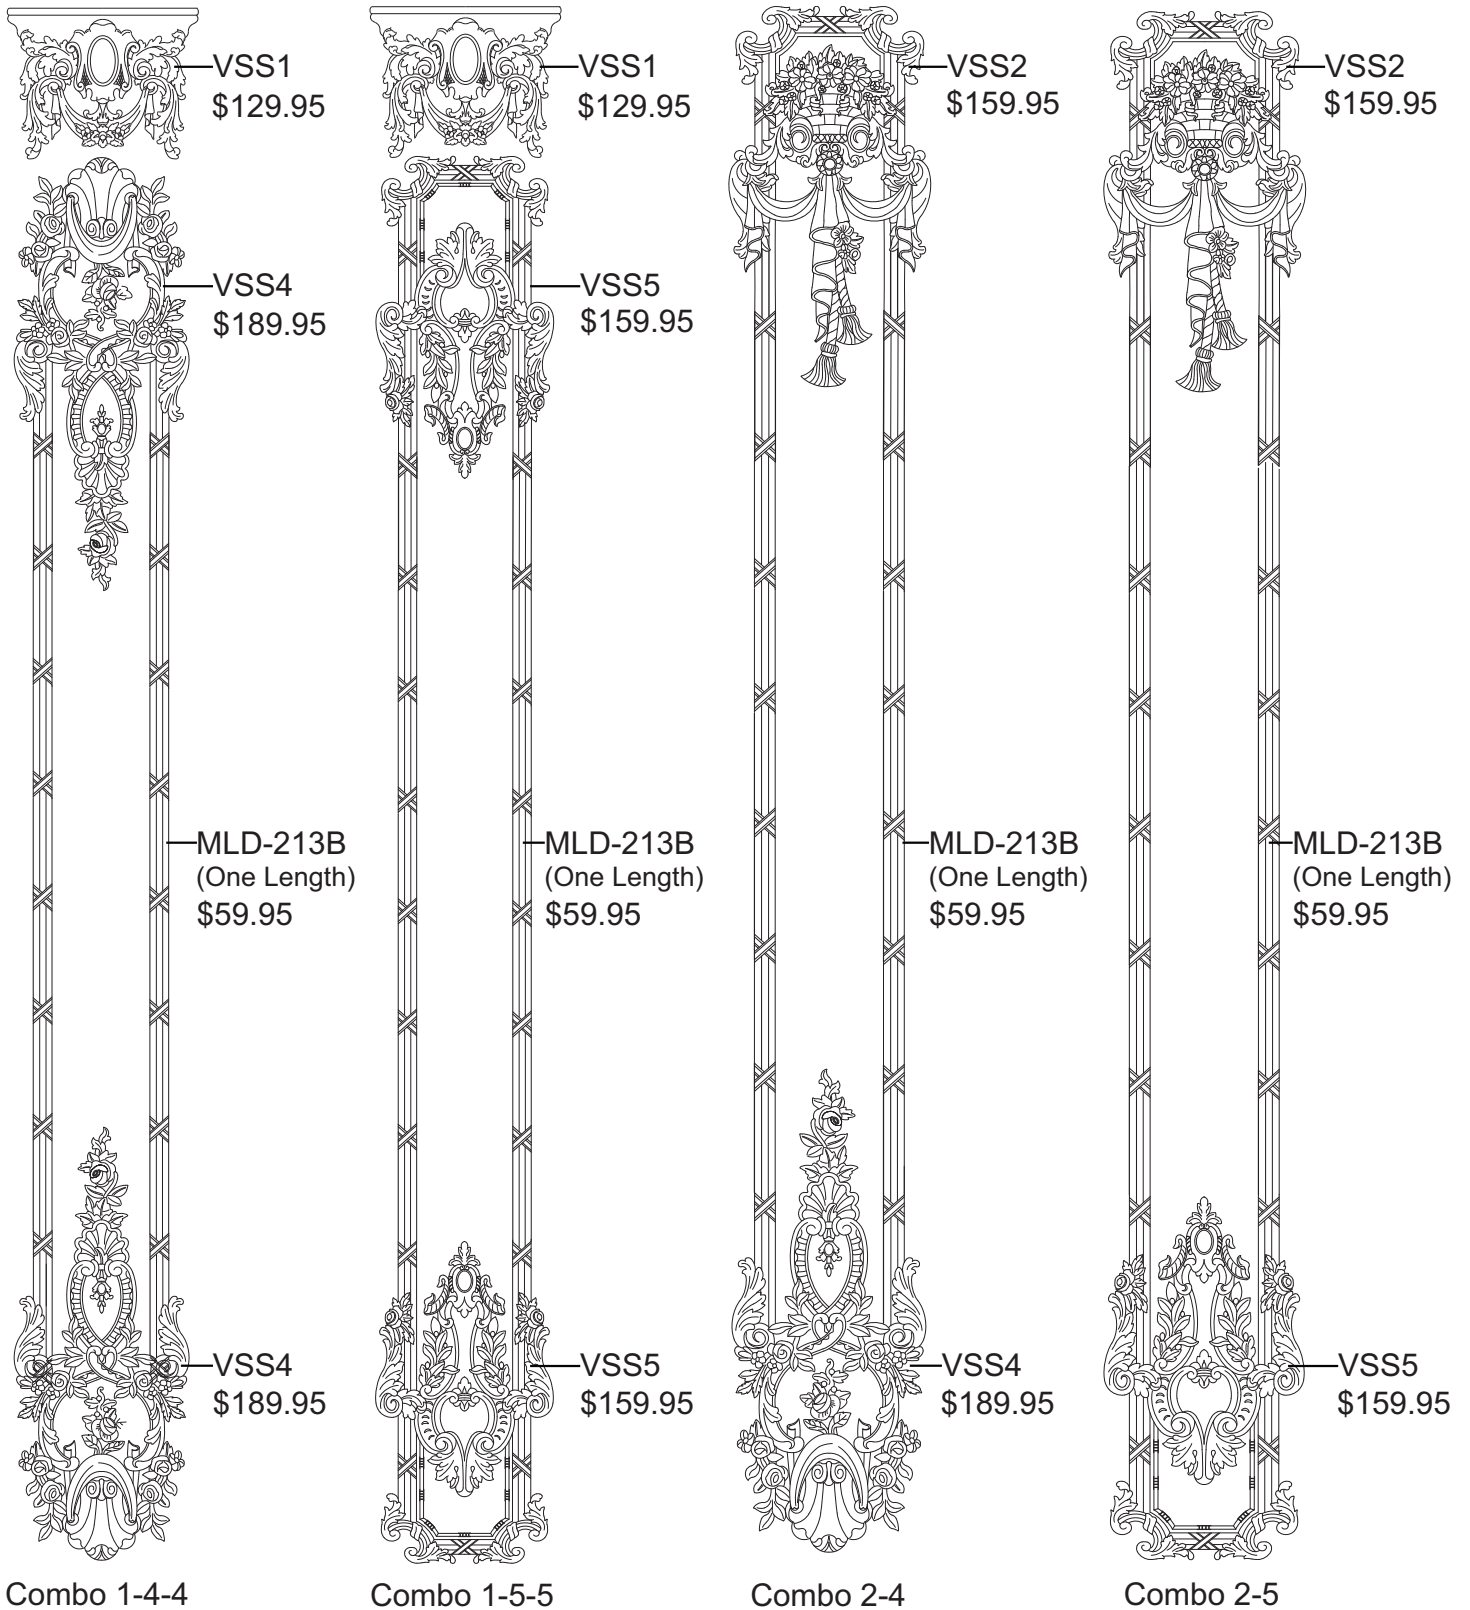

\* Each of the 5 versailles modular designs can be used in any combination and quantity to create any height required.

SIDE PANEL SET  
Total \$799.70 (as shown)  
Including 1 length of MLD-213B

\* Side Panel Thickness  
Varies from 1/2" to 1-1/2"

# Custom Freestyle Wallpanels

Custom wall panels can be created by using any number of components to create a top and bottom wall panel header. CP-217A is a single casting with additional scrolls added to create the attachment point for connection mouldings.

CP-217A comes in three additional sizes for added versatility which can not only create different sized wall panels and ceilings as well.

CP-217

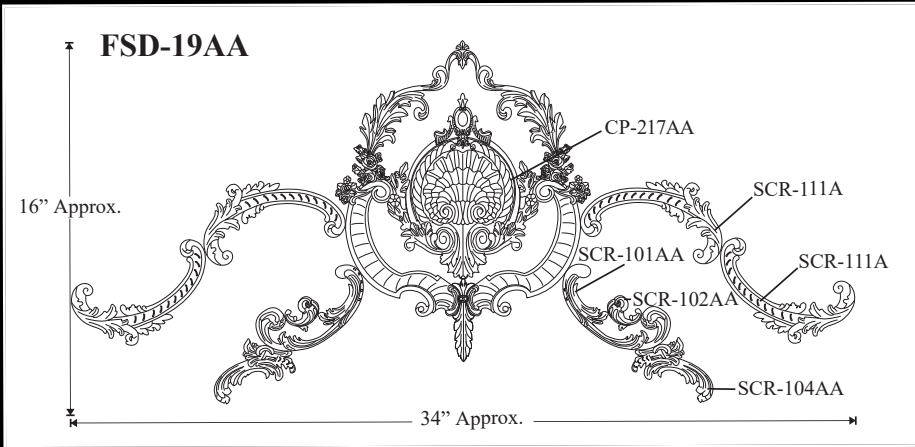

\* All sizes are approx. - max W" x max H" x Thickness"
